Aumni Group Inc. Website Project Brief
Prepared by: Samantha Piper
Prepared for: Aumnia Group Inc.
Date: July 6th, 2026

Project Overview:

This is a business website being developed for Aumnia Group Inc., a company specializing in commercial real estate rental and Airbnb vacation rental. The website will serve as a professional online space that showcases available properties, communicates the company's services, and provides visitors with a clear path to explore investment opportunities or ask about rental spaces. This project aims to create a modern, user-friendly experience that reflects the company's professionalism, while supporting its continued growth.

Business Goals:

- Present Aumnia Group Inc. as a credible and professional real estate company
- Attract qualified investors to ask about investment opportunities
- Entice business owners to rent commercial space
- Promote Airbnb properties to tourists and local staycation guests

User & Functional Goals:

- Enable property discovery and selection(give visitors the ability to browse available properties and help them to filter or identify spaces that match their specific needs— business use, vacation stay, location, size, etc.)
- Centralize property information(ensure rental listings are organized and easy to navigate; keep property details consistent)
- Enable direct client questions(make it easy for visitors to contact the business about specific properties by providing a variety of communication methods)
- Improve property understanding through a visual experience(allow visitors to explore properties through virtual tours, helping them better evaluate the space)
- Support the multi-audience experience(serve different visitors without confusing the purpose and navigation— ensure each group can find the information relevant to them quickly)

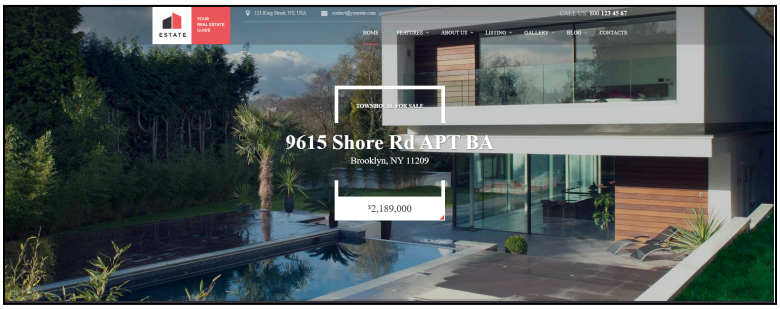

Target Audience:

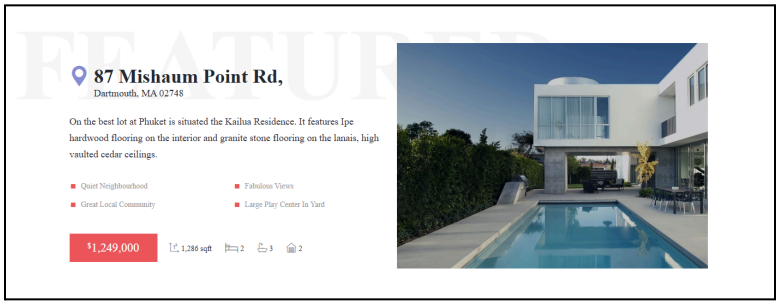

- Real Estate investors interested in growing their portfolios
- Business owners looking to rent commercial space
- Tourist looking to rent an Airbnb
- Locals looking for a staycation

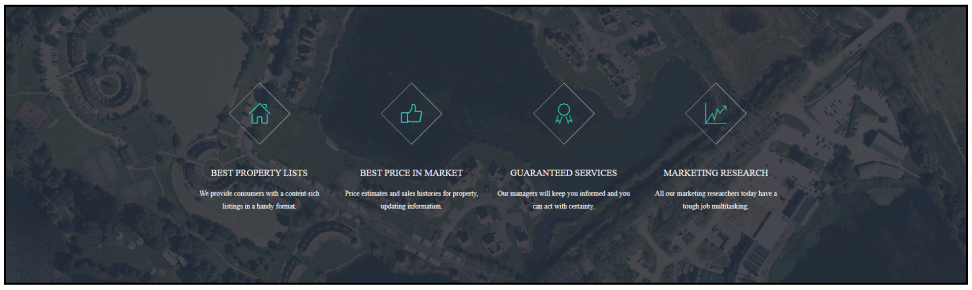

Question: Although both groups are target audiences, which one takes more precedence over the Other? Long term it will be real estate inventors interested in growing their portfolios. For now it is tourists looking for short term rentals

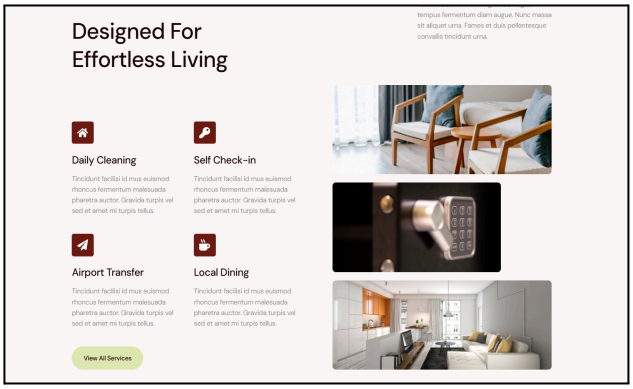

Brand & Visual Direction:

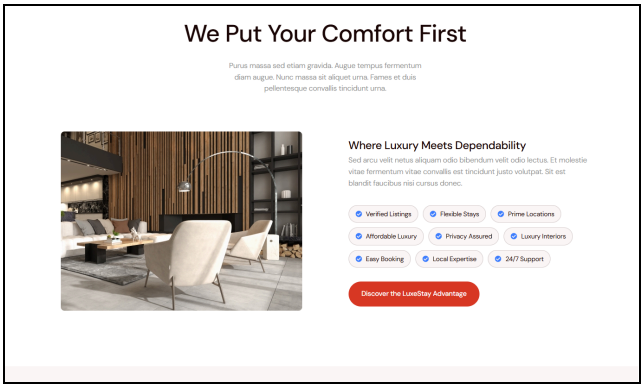

- **Personality:** Professional
- **Color Direction:** Existing brand colours, Caribbean influence
- **Typography:** Professional and elegant typefaces and fonts; gentle, yet eye-catching headers and titles; tight, compact letter-spacing
- **Visual Inspiration:**
  Questions: Do any of these photos speak to the layout, design, and featured information you want? 87 Misham POint Road looks pleasing to my eyes with info right there

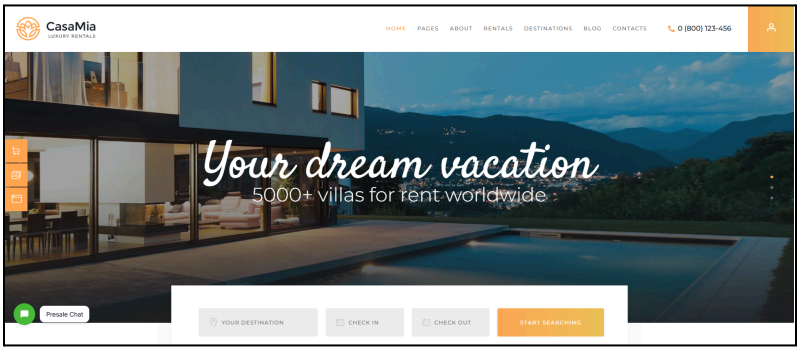

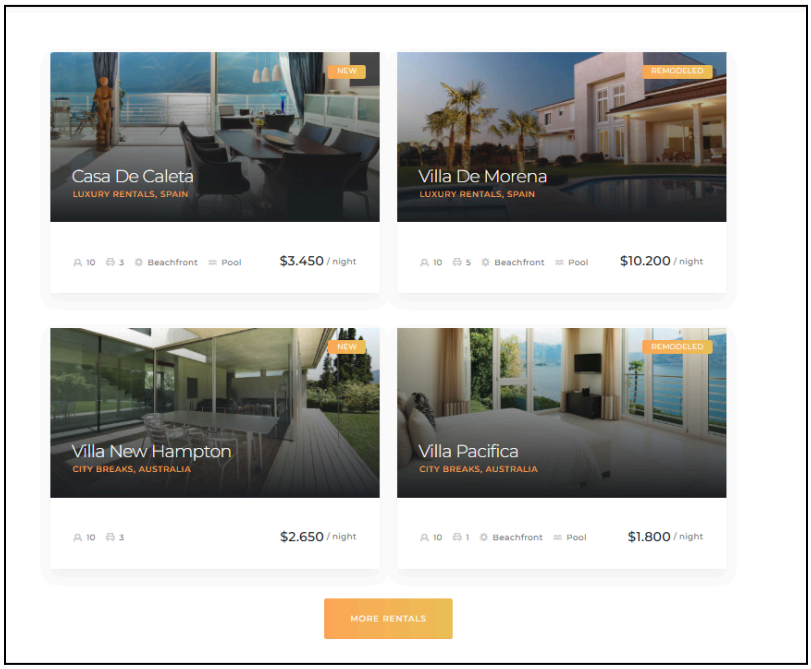

Required Pages:

- Home Page
- About Page
- Contact Page

- Investors Info Page(where investors can get more information regarding what investment in the business will actually look like, any deals, additional business information, the process, specific contact information, etc.)
- Separate rental property pages(for when a visitor clicks on one of the properties in hopes of learning more about it | *This could a pop-up instead of a page if you feel there is not enough additional information to create an entire webpage for*)

Question: Do you have any other pages in mind? Commercial for rent, residential/ vacation for rent, land for sale

Example of how you can utilize tabs within one page from your header
Question: Does this give you a better idea about how tabs could work within your website? Does it help to make it clearer whether you would like to include them or not? Yes i like the tabs i personally like them up above horizontally BUT ... open to new things

Required Functionalities:

- Clicking on images to see more information
- Playing videos
- Responsive navigation menu
- Property listing interactions(clicking and seeing more information)
- Booking Requests
- Property image gallery
- Interacting with the contact form
- Quick access to contact links
- Interacting with the virtual tours
- Interacting with location maps

Deliverables:

- 5-page responsive website
- Contact page with form and interactive map
- Interactive property listings
- Booking request functionality
- Virtual tours
- Investor information page

Content Needed:

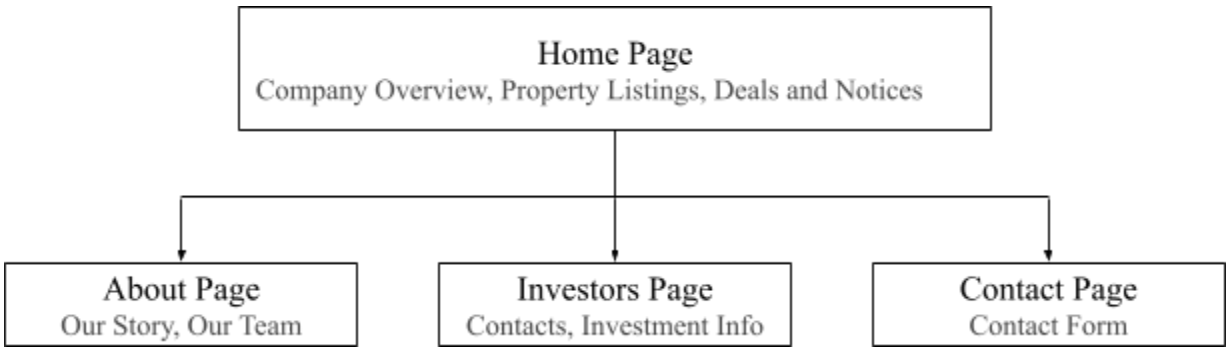

- Images
- Videos
- Contact Information
- Brand identity(logos)
- Rental property information
- Locations
- Investment proposal information
- Any additional, necessary information

Success Metrics:

Success will be measured through analytics: the number of people who visit the site; available, basic information about visitors; and which pages, properties, and services visitors view the most
